Task 2: Test log

Description of test	Test data to be used (if required)	Expected outcome	Actual outcome	Comments and intended actions
Testing the logo in navigation bar	No test data	Upon clicking, home page is loaded	Expected outcome was met and clicking the logo caused the Home page to load	PASS Testing the Shop navigation button in navigation bar	No test data	Upon clicking, Products page is loaded	Expected outcome was met and clicking the Shop button caused the Products page to load	PASS Testing the Growers navigation button in navigation bar	No test data	Upon Clicking, Producers page is loaded	Expected outcome was met and clicking the Growers button caused the Producers page to load	PASS Testing the Orders navigation button in navigation bar as a logged in user	No test data	Upon clicking, Orders page is loaded	Expected outcome was met and clicking the Orders button caused the Orders page to load	PASS Testing the Orders navigation button in navigation bar as a non logged in user	No test data	Upon clicking, Access Denied page is loaded	Expected outcome was met and clicking the Orders button caused the Access Denied page to load	PASS 
Testing the Register navigation button in navigation bar	No test data	Upon clicking, Register page is loaded	Expected outcome was met and clicking the Register button caused the Register page to load	PASS Testing the Login navigation button in navigation bar	No test data	Upon clicking, Login page is loaded	Expected outcome was met and clicking the Login button caused the Login page to load	PASS Testing the Basket navigation button in navigation bar as a logged in user	No test data	Upon clicking, Basket page is loaded	Expected outcome was met and clicking the Basket button caused the Baskets page to load	PASS Testing the Basket navigation button in navigation bar as a producer	No test data	Upon clicking, Access Denied page is loaded	Expected outcome was met and clicking the Basket button caused the Access Denied page to load	PASS 
Testing the All Products navigation link in page footer	No test data	Upon clicking, Products page is loaded	Expected outcome was met and clicking the Products link caused the Products page to load	PASS Testing the My Basket navigation link in page footer as logged in user	No test data	Upon clicking, Basket page is loaded	Expected outcome was met and clicking the Basket link caused the Basket page to load	PASS Testing the My Basket navigation link in page footer as non logged in user	No test data	Upon clicking, Access Denied page is loaded	Expected outcome was met and clicking the Basket button caused the Access Denied page to load	PASS 
Testing the My Basket navigation link in page footer as producer	No test data	Upon clicking, Access Denied page is loaded	Expected outcome was met and clicking the My Basket link caused the Access Denied page to load	PASS Testing the My Orders navigation link in page footer as logged in user	No test data	Upon clicking, Orders page is loaded	Expected outcome was met and clicking the My Orders link caused the Orders page to load	PASS Testing the My Orders navigation link in page footer as non logged in user	No test data	Upon clicking, Access Denied page is loaded	Expected outcome was met and clicking the My Orders link caused the Access Denied page to load	PASS 
Testing the My Orders navigation link in page footer as producer	No test data	Upon clicking, Access Denied page is loaded	Expected outcome was met and clicking the My Orders link caused the Access Denied page to load	PASS Testing the Meet the Farmers navigation link in page footer	No test data	Upon clicking, Producers page is loaded	Expected outcome was met and clicking the Meet the Farmers link caused the Producers page to load	PASS Testing the Producer Dashboard navigation link in the page footer is hidden for standard logged in users	No test data	The navigation link for Producer Dashboard is hidden	Expected outcome was not met and the navigation link for Producer Dashboard is visible.	FAIL FIX REGRESSION TEST – PASS

				Testing the Producer Dashboard navigation link in the page footer is hidden for admins	No test data	The navigation link for Producer Dashboard is hidden	Expected outcome is met and the navigation link for Producer Dashboard is hidden	PASS Testing the Producer Dashboard navigation link in the page footer is visible for producers	No test data	The navigation link for Producer Dashboard is displayed in the page footer visibly	Expected outcome was met and the navigation link for Producer Dashboard is visible.	PASS Testing the Producer Dashboard navigation link in the page footer is visible for developers	No test data	The navigation link for Producer Dashboard is displayed in the page footer visibly	Expected outcome was not met and the navigation link for Producer Dashboard is hidden.	FAIL FIX REGRESSION TEST – PASS

				Testing the Producer Dashboard page is not accessible by standard users	No test data	Attempting to access the Producer Dashboard loads the Access Denied page	Expected outcome was met and clicking accessing the page through the web address loaded the Access Denied page	PASS Testing the Producer Dashboard page is not accessible by admin users	No test data	Attempting to access the Producer Dashboard loads the Access Denied page	Expected outcome was met and clicking accessing the page through the web address loaded the Access Denied page	PASS Testing the Producer Dashboard navigation link in the page footer takes	Must be logged in as developer or producer role assigned account	Upon clicking, Producer Dashboard is loaded	Expected outcome was met and clicking the My Orders link caused the Access	PASS

you to the correct page			Denied page to load	Testing the Privacy navigation link in page footer as producer	No test data	Upon clicking, Producer Dashboard is loaded	Expected outcome was met and clicking the Privacy link caused the Privacy page to load	PASS Testing the Sign-Up navigation link in page footer as producer	No test data	Upon clicking, Register page is loaded	Expected outcome was met and clicking the Register link caused the Register page to load	PASS Testing the Account Profile navigation button in navigation bar as logged in user	No test data	Upon Clicking, Account Settings page is loaded	Expected outcome was met and clicking the Account 'hello email' caused the Account page to load	PASS 
Testing Account Profile page as a non logged in user through web address	No test data	The user should be taken to the log-in page	Expected outcome was met and user was taken to the login page	PASS Testing Account Email page as a non logged in user through web address	No test data	The user should be taken to the log-in page	Expected outcome was met and user was taken to the login page	PASS Testing Account Password page as a non logged in user through web address	No test data	The user should be taken to the log-in page	Expected outcome was met and user was taken to the login page	PASS

				Testing Account Two Factor Authentication page as a non logged in user through web address	No test data	The user should be taken to the log-in page	Expected outcome was met and user was taken to the login page	PASS 
Testing Personal Data page as a non logged in user through web address	No test data	The user should be taken to the log-in page	Expected outcome was met and user was taken to the login page	PASS Testing navigation for Shop the Harvest button on the home page	No test data	Upon clicking, Products page is loaded	Expected outcome was met and Product page loads	PASS Testing effects for Shop the Harvest button on the home page	No test data	When mouse hovers over button, it should enable a hover effect with a blur behind it	Expected outcome was met, the button hovers with a blur	PASS 
Testing the navigation for Meet our Producers button on the home page	No test data	Upon clicking, Producers page is loaded	Expected outcome was met and Producers page loads	PASS Testing effects for Meet our Producers button on the home page	No test data	When mouse hovers over button, it should enable a hover effect with a green outline around the button	Expected outcome was met, the button hovers with a green outline	PASS Testing effects for Spring Produce card on the home page	No test data	When mouse hovers over the card, a popping effect plays whilst the mouse is still hovering over the card	Expected outcome was met, the card plays a popping hover effect	PASS

Testing effects for 'Local UK Farms' 'Next-day delivery' 'Zero plastic' text on the home page underneath the Shop the Harvest button	No test data	When mouse hovers over the text, a hover effect plays whilst the mouse is still hovering over it and the text should turn from grey to green	Expected outcome was met, the text individually plays a hover effect	PASS Testing arrow button on home page	No test data	When clicked it should scroll the user down the page to the next section	Expected outcome was met, the user is scrolled down the page	PASS Testing effects arrow button on home page	No test data	When hover over the arrow turns green	Expected outcome was met, the arrow turns green upon mouse hover	PASS Testing effects for product cards on home page	No test data	When hovered over by mouse, a hover effect plays individually for each card, zooming in the image and highlight the card being hovered over	Expected outcome was met, hover effect plays individually for each card	PASS 
Testing navigation for Goto shop button placed on product cards on the home page	No test data	Upon clicking, Products page is loaded	Expected outcome was met, the Products page loads	PASS
Testing effects for Goto shop button placed on product cards on the home page	No test data	When mouse hovers over button, it enables a hover effect with a blur behind it	Expected outcome was met, the button hovers with a blur	PASS
Testing See everything growing button on the home page	No test data	When mouse hovers over button, it enables a hover effect and fills the button with a sage green	Expected outcome was met, the button hovers and fills	PASS Testing effects for Grab this Deal button on the home page	No test data	When mouse hovers over button, it enables a hover effect with a blur behind it	Expected outcome was met, the button hovers with a blur	PASS 
Testing effects for image at the health bundle section on the home page	No test data	When the mouse is placed on the image, the floating effect pauses until the mouse is moved off and the 'Just packed' label does a pop effect and as the mouse moves across the image confetti particles are played	Expected outcome, confetti particles play, pop effect plays and animation temporarily pauses	PASS
Testing effects for icons in the 'The process' section on the homepage	No test data	When the mouse is placed on any of the icons a hover effect should play on that icon, slightly tilting it	Expected outcome, if mouse is placed on the icon it tilts until moved	PASS
Testing effects for producer cards on the home page	No test data	When the mouse hovers over each producer card the image slightly zooms and has a shadow	Expected outcome, shadow displays and image zooms	PASS
Testing navigation for Meet all our growers button on home page	No test data	Upon clicking, Producers page is loaded	Expected outcome, producers page loads	PASS 
Testing effects for Meet all our growers button on home page	No test data	When mouse hovers over button, it enables a hover effect and fills the button with a sage green	Expected outcome was met, the button hovers and fills	PASS Testing page scrolling	No test data	Scrolling down the page is smooth	Expected outcome was met, smooth scrolling	PASS
Testing effects of statistics on home page	No test data	As you scroll to the statistic section, each statistic should have an animation which gradually increases the number	Expected outcome was met, the number gradually increases	PASS

Testing navigation on Start Shopping button at the bottom of the home page	No test data	Upon clicking, Products page loads	Expected outcome was met, Products page is loaded	PASS Testing effects on Start Shopping button at the bottom of the home page	No test data	When mouse hovers over button, it enables a hover effect with a blur behind it	Expected outcome was met, the button hovers with a blur	PASS
Testing effects on Create Account button at the bottom of the home page	No test data	When mouse hovers over button, it enables a hover effect with a white outline/highlight	Expected outcome was met, the button hovers with a white outline/highlight	PASS
Testing navigation on Create Account button at the bottom of the home page	No test data	Upon clicking, Register page loads	Expected outcome was met, Register page is loaded	PASS Testing effects for navigation links in the page footer	No test data	When mouse hovers over link, text changes to white	Expected outcome was met, text turns white	PASS 
Testing effects for logo in navigation bar	No test data	When mouse hovers over logo, it should lighten or lower in opacity	Expected outcome was met, logo lightens	PASS
Testing effects for navigation buttons in navigation bar	No test data	When mouse hovers over button, the text turns black and a sage green background appears behind text	Expected outcome was met, turns black and background appears	PASS
Testing effects for basket button in navigation bar	No test data	When mouse hovers over button, hover effect should play and the button should darken	Expected outcome was met, button hovers and darkens	PASS Testing effects for animated sliding details on Products page	No test data	When mouse hovers over, effect will pause	Expected outcome was met, effect pauses	PASS
Testing search bar for products on Products page	Search: Apple	When the product is inputted into the text box, it only finds products which contain those characters	Expected outcome was not met, it would display only one of the products due to scroll-in effects	FAIL  It searches the product but it is only showing one of them, the others

				areinvisible FIX   REGRESSION TESTING – PASS Testing All products filter on Products page	Filter: In Stock -> Filter: All	Enabled by default, but if clicked from another filter it will display all products	Expected outcome was met, it displays all products	PASS Testing Product categories filter for Dairy product on Products page	Category: Filter: Dairy	It will display only products under the Dairy category	Expected outcome was met, only Dairy product is displayed	PASS 
Testing Product categories filter for Fruit product on Products page	Category Filter: Fruit	It will display only products under the Fruit category	Expected outcome was met, only Fruit product is displayed	PASS Testing Product categories filter for Meat product on Products page	Category Filter: Meat	It will display only products under the Meat category	Expected outcome was met, only Meat product is displayed	PASS Testing Product categories filter for Vegetable product on Products page	Category Filter: Vegetable	It will display only products under the Vegetable category	Expected outcome was met, only Vegetable product is displayed	PASS Testing Producer category filter for pre-existing producer on products page	Producer Filter: Green Valley Produce	It will display only products listed by Green Valley Produce	Expected outcome was met, only Green Valley Produce product is displayed	PASS Testing In stock button filter on products page	Stock Filter: In Stock	Once selected, unavailable items are hidden	Expected outcome was met, available products are displayed	PASS

				Testing Out of stock button filter on products page	Stock filter: Out of stock	Once selected, only unavailable items are displayed	Expected outcome was met, unavailable products are displayed	PASS Testing Low to high sort filter on products page	Sort filter: Price: Low -> High	Once selected, lowest priced items are displayed at the top of the product list	Expected outcome was met, cheapest products are at the top	PASS Testing High to low sort filter on products page	Sort filter: Price: High -> Low	Once selected, highest priced items are displayed at the top of the product list	Expected outcome was met, highest valued products are at the top	PASS Testing Name A to Z sort filter on products page	Sort filter: Name: A → Z	Once selected, products are displayed alphabetically from A to Z	Expected outcome was met, products are displayed in alphabetical order from A to Z	PASS

				Testing Name Z to A sort filter on products page	Sort filter: Name: Z → A	Once selected, products are displayed in reverse alphabetical order from Z to A	Expected outcome was met, products are displayed in reverse alphabetical order from Z to A	PASS Testing search bar with partial product name on Products page	Search: partial product name e.g. 'App'	Only products whose names contain those characters are displayed	Expected outcome was met, only products containing the searched characters are displayed	PASS Testing search bar with no matching product name on Products page	Search: a string that matches no products e.g. 'zzzz'	No products are displayed and the empty state message is shown	Expected outcome was met, no products are displayed and the empty state is visible	PASS Testing search bar with empty input on Products page	Search: clear the search bar	All products are displayed once the search input is cleared	Expected outcome was met, all products are displayed when search is cleared	PASS

				Testing All Categories filter option on Products page	Category Filter: All Categories	All products across every category are displayed	Expected outcome was met, all products are displayed regardless of category	PASS Testing All Producers filter option on Products page	Producer Filter: All Producers	All products from every producer are displayed	Expected outcome was met, all products are displayed regardless of producer	PASS Testing combining category filter and producer filter on Products page	Category Filter: Fruit, Producer Filter: Green Valley Produce	Only products that are both under the Fruit category and listed by GreenValley Produce are displayed	Expected outcome was met, only matching products for both filters aredisplayed	PASS Testing combining search bar and category filter on Products page	Category Filter: Fruit, Search: Apple	Only products under the Fruit category whose name contains the search term are	Expected outcome was met, only the matching filtered and searched product is	PASS

		displayed	displayed	Testing combining availability filter and sort filter on Products page	Stock Filter: In Stock, Sort filter: Price: Low → High	Only in stock products are displayed and they are sorted from lowest to highest price	Expected outcome was met, in stock products are displayed in ascending price order	PASS Testing Clear button resets all active filters on Products page	Apply any combination of filters, then click Clear	All active filters are cleared and all products are displayed	Expected outcome was met, clicking Clear resets all filters and displays all products	PASS Testing Reset Filters button on empty state on Products page	Apply filters that return no results, then click Reset Filters	All filters are cleared and all products are displayed	Expected outcome was met, clicking Reset Filters clears all filters and all products are shown	PASS Testing empty state is shown when no products match the applied filters on Products page	Apply filters that return no results	The empty state message is displayed in the product grid	Expected outcome was met, the empty state message is shown when no products match	PASS

Testing Add to basket as a non logged in user by saving via web address on Products page	No test data	An error label is displayed and the item is not added to a basket	Expected outcome was met, an error label is displayed and the item is not added	PASS
Testing Add to basket as a developer account by saving via web address on Products page	Must be logged in as developer role assigned account	An error label is displayed and the item is not added to a basket	Expected outcome was met, an error label is displayed and the item is not added	PASS
Testing Add to basket as a producer account by saving via web addresson Products page	Must be logged in as producer role assigned account	An error label is displayed and the item is not added to a basket	Expected outcome was met, an error label is displayed and the item is not added	PASS
Testing Add to basket as an admin account by saving via web address on Products page	Must be logged in as admin role assigned account	An error label is displayed and the item is not added to a basket	Expected outcome was met, an error label is displayed and the item is not added	PASS
Testing Add to basket successfully adds a product for a standard logged in user on Products page	Must be logged in as standard user, select any in stock product	The item is added to the basket, a success pop-up confirmation message appears at the bottom of the screen and a confetti burst effect plays on	Expected outcome was met, the item is added, the pop-up message appears and the confetti burst plays	PASS 
		the Add button		
Testing Add to basket button shows a loading spinner whilst the request is processing on Products page	Must be logged in as standard user, click the Add button on any in stock product	The Add button is disabled and displays a loading spinner whilst the request is in progress	Expected outcome was met, the button is disabled and the spinner is displayed during the request	PASS Testing Add to basket button turns green with a tick on successful save action on Products page	Must be logged in as standard user, click the Add button on any in stock product	Once the request succeeds the Add button briefly turns green and shows a tick before reverting	Expected outcome was met, the button turns green with a tick and then reverts after a short delay	PASS
Testing Add to basket pop-up confirmation message appears and disappears on Products page	Must be logged in as standard user, add any in stock product to basket	A pop-up confirmation message slides up from the bottom of the screen confirming the item was added, then fades out after a short delay	Expected outcome was met, the pop-up message appears and fades out correctly	PASS Testing Add to basket pop-up confirmation message shows quantity when more	Must be logged in as standard user, set quantity to more than 1 then click Add	The pop-up confirmation message displays the quantity alongside the item name	Expected outcome was met, the pop-up message shows the quantity and item name correctly	PASS 
than one item is added on Products page				
Testing basket label count updates after a product is added on Products page	Must be logged in as standard user, add any in stock product to basket	The basket icon label in the navigation bar updates to show the new item count	Expected outcome was met, the basket label count updates correctly	PASS Testing Add to basket button turns red and shows error pop-up message on failed save action on Products page	Must be logged in as standard user, attempt to add a product that triggers a failure response	The Add button turns red and an error pop-up message is displayed at the bottom of the screen	Expected outcome was met, the button turns red and the error pop-up message is displayed	PASS
Testing quantity defaults to 1 on each product card on Products page	No test data	Each product card displays a default quantity of 1 in the quantity control	Expected outcome was met, every product card shows a default quantity of 1	PASS Testing quantity add button increases the quantity on Products page	Click the + button on any in stock product card	The displayed quantity increases by 1 each time the + button is clicked	Expected outcome was met, the quantity increases by 1 on each click	PASS
Testing quantity decrease button decreases the quantity on Products	Set quantity above 1, then click the - button on any in stock product card	The displayed quantity decreases by 1 each time the - button is clicked	Expected outcome was met, the quantity decreases by 1 on each click	PASS

page				
Testing quantity cannot be decremented below 1 on Products page	With quantity at 1, click the - button on any in stock product card	The quantity remains at 1 and don't go below 1	Expected outcome was met, the quantity stays at 1 and cannot be reduced further	PASS
Testing quantity cannot be added above 99 on Products page	No test data	The quantity remains at 99 and wont go higher than 99	Expected outcome was met and the quantity stays at 99 and cannot be increased further	PASS
Testing View details link navigates to the correct product details page on Products page	No test data	Upon clicking, the correct product's details page is loaded	Expected outcome was met and the correct product details page is loaded	PASS 
				Testing View details link is visible to standard logged in users on Products page	No test data	The View details link is visible on each product card	Expected outcome was met and the View details link is visible on every product card	 PASS
Testing View details link is visible to non logged in users on Products page	No test data	The View details link is visible on each product card	Expected outcome was met and the View details link is visible on every product card	 PASS
Testing View details link is not shown for producer accounts and is replaced with producer admin controls on Products page	No test data	The View details link is replaced with Details, Edit and Delete producer admin controls on each product card	Expected outcome was met and the producer admin controls replace the View details link	PASS

Testing out of stock product cards display at a low opacity on Products page	No test data	Product cards for out of stock or unavailable items are displayed at a lower opacity	Expected outcome was met and out of stock cards are shown at lower opacity	PASS Testing out of stock product card images are displayed in greyscale on Products page	No test data	Product images on out of stock or unavailable cards have a partial greyscale filter applied	Expected outcome was met and the images on out of stock cards are shown with a greyscale filter	PASS Testing the filter bar remains fixed in place below the navigation bar when scrolling on Products page	No test data	When scrolling down the page the filter bar sticks below the navigation bar and stays in place	Expected outcome was met and the filter bar remains fixed in place below the navigation bar while scrolling	PASS

Testing the producer admin management bar is visible for producer accounts on Products page	No test data	A producer management bar is displayed at the top of the product grid with an Add Product button	Expected outcome was met and the producer management bar is displayed with the Add Product button	PASS
Testing the producer admin management bar is not visible for standard logged in users on Products page	No test data	The producer management bar is not visible	Expected outcome was met and the producer management bar is not shown	PASS
Testing the basket page successfully applies the health bundle discount	Basket with apple, broccoli, carrot	Basket page displays the user the discount is applied to their order in the order summary section	Expected outcome was met and the discount was applied to the order total	PASS 
Testing the Create Product page is not accessible to non logged in users	No test data	Trying to open the Create Product page takes you to the login page	Expected outcome was met and accessing the web address loaded the Login page	PASS Testing the Create Product page is not accessible to standard customer accounts	No test data	Trying to open the Create Product page loads the Access Denied page	Expected outcome was met and accessing the page loaded the Access Denied page	PASS Testing the Create Product page is not accessible to admin accounts	No test data	Trying to open the Create Product page loads the Access Denied page	Expected outcome was met and accessing the page loaded the Access Denied page	PASS Testing the Create Product page is accessible to producer accounts	No test data	The Create Product page loads	Expected outcome was met and the Create Product page loaded	PASS
Testing the Create Product page is accessible to developer accounts	No test data	The Create Product page loads	Expected outcome was met and the Create Product page loaded	PASS
Testing the page title displays correctly on the Create Product page	No test data	The browser tab and page heading display Create Product	Expected outcome was met and the title and heading displayed as expected	PASS

Testing the navigation trail on the Create Product page displays Home, Products, Create	No test data	The navigation trail displays Home / Products / Create in order	Expected outcome was met and the navigation trail displayed in the correct order	PASS
Testing the Home navigation trail link on the Create Product page navigates to the home page	No test data	Upon clicking the Home navigation trail link, the home page is loaded	Expected outcome was met and clicking the Home navigation trail loaded the home page	PASS
Testing the Products navigation trail link on the Create Product page navigates to the products page	No test data	Upon clicking the Products navigation trail link, the Products page is loaded	Expected outcome was met and clicking the Products navigation trail loaded the Products page	PASS
Testing the image preview card shows the placeholder image when no image is selected on the Create Product page	No test data	The image preview area displays the placeholder image and the path label shows 'no image selected'	Expected outcome was met and the placeholder icon and label were displayed	PASS
Testing the Product name field is present and accepts text input on the Create Product page	Product name: Fresh Organic Tomatoes	The Product name input accepts text and displays the typed value	Expected outcome was met and the text was accepted and displayed in the field	PASS

Testing that the product name live preview updates the image card name label as the user types on the Create Product page	Product name: Fresh Organic Tomatoes	As the user types in the Product name field, the name label on the image preview card updates as you type	Expected outcome was met and the name label updated as expected as text was entered	PASS
Testing that the image card name label displays New product when the Product name field is empty on the Create Product page	Product name: cleared / empty	The image preview card name label shows New product when the input is empty	Expected outcome was met and the label reverted to New product when the input was cleared	PASS
Testing the Category dropdown is present and contains all expected options on the Create Product page	No test data	The Category dropdown contains the placeholder plus Vegetables, Fruit, Dairy, Eggs, Meat, Bakery, Honey & Preserves, Herbs & Flowers, Drinks, and Other	Expected outcome was met and all expected category options were present	PASS
Testing the Category dropdown requires a selection on the Create Product page	Save form without selecting a category	A validation error is shown prompting the user to select a category	Expected outcome was met and a validation error was displayed for the Category field	PASS

Testing the Upload image field accepts JPG files on the Create Product page	Upload a .jpg image file	The file is accepted and the image preview card updates to show the uploaded image	Expected outcome was met and the JPG was accepted and the preview updated	PASS
Testing the Upload image field accepts PNG files on the Create Product page	Upload a .png image file	The file is accepted and the image preview card updates to show the uploaded image	Expected outcome was met and the PNG was accepted and the preview updated	PASS
Testing the Upload image field accepts WebP files on the Create Product page	Upload a .webp image file	The file is accepted and the image preview card updates to show the uploaded image	Expected outcome was met and the WebP was accepted and the preview updated	PASS
Testing that the uploaded image overrides the existing image dropdown selection on the Create Product page	No test data	The uploaded file takes priority and the preview displays the uploaded image, not the dropdown selection	Expected outcome was met and the uploaded image was used in the preview instead of the dropdown choice	PASS
Testing the existing image dropdown fills with images from the site image library on the Create Product page	No test data	The existing image dropdown lists the image files available in the the site image library folder	Expected outcome was met and the dropdown was filled with the available images	PASS

Testing that selecting an existing image from the dropdown updates the image preview on the Create Product page	No test data	The image preview card updates to display the selected image and the path label updates to the selected path	Expected outcome was met and the preview and label updated when an existing image was selected	PASS
Testing that clearing the existing image dropdown reverts the preview to the placeholder on the Create Product page	No test data	The image preview card reverts to the placeholder image and the path label reads no image selected	Expected outcome was met and the preview reverted to the placeholder	PASS
Testing the Description text area is present and accepts multi-line input on the Create Product page	Description: multi-line test text	The text field accepts and displays the entered text across multiple lines	Expected outcome was met and multi-line text was accepted and displayed as expected	PASS
Testing the Description field is required and shows a validation error on the Create Product page	Save form with no description entered	A validation error is shown for the Description field	Expected outcome was met and a validation error was displayed	PASS
Testing the Price number control add button increases the price by 0.01 on the Create Product page	No test data	The price input value increases by 0.01 with each click	Expected outcome was met and the price increases by 0.01	PASS

Testing the Price number control decrement button decreases the price by 0.01 on the Create Product page	Set price above 0.01, then click - on the price number control	The price input value decreases by 0.01 with each click	Expected outcome was met and the price decremented by 0.01	PASS
Testing the Price number control cannot decrement below the minimum value of 0.01 on the Create Product page	Set price to 0.01 then click the decrease button	The price value remains at 0.01 and will not go below the minimum	Expected outcome was met and the price stayed at the minimum value	PASS
Testing the Quantity number control increase button increases the quantity by 1 on the Create Product page	No test data	The quantity input value increases by 1 with each click	Expected outcome was met and the quantity increases by 1	PASS
Testing the Quantity number control decrement button decreases the quantity by 1 on the Create Product page	Set quantity above 0, then click - on the quantity number control	The quantity input value decreases by 1 with each click	Expected outcome was met and the quantity decremented by 1	PASS
Testing the Quantity number control cannot decrement below 0 on the Create Product page	Set quantity to 0 then click the decrease button	The quantity value remains at 0 and doesn’t go below the minimum	Expected outcome was met and the quantity stayed at 0	PASS

Testing the Listed for sale on/off switch is present and defaults to off on the Create Product page	No test data	The Listed for sale on/off switch is visible and in the off/unchecked state by default	Expected outcome was met and the on/off switch was present and defaulted to off	PASS
Testing the Listed for sale on/off switch can be switched on and off on the Create Product page	No test data	The on/off switch switches between checked and unchecked states on each click	Expected outcome was met and the on/off switch changed state correctly on each click	PASS
Testing allergen tag buttons all 14 allergens are displayed on the Create Product page	No test data	All 14 quick-add allergen tag buttons are visible: Gluten, Milk, Eggs, Peanuts, Tree nuts, Fish, Crustaceans, Sesame, Sulphites, Mustard, Celery, Soybeans, Lupin, Molluscs	Expected outcome was met and all 14 allergen tag buttons were displayed	PASS
Testing that clicking an allergen tag button adds that allergen to the allergen input on the Create Product page	No test data	Gluten is added to the allergen text input field	Expected outcome was met and Gluten appeared in the allergen input	PASS

Testing that clicking an active allergen tag button removes it from the allergen input on the Create Product page	No test data	Gluten is removed from the allergen text input field	Expected outcome was met and Gluten was removed from the input on the second click	PASS
Testing that multiple allergen tag buttons can be selected simultaneously on the Create Product page	No test data	All three allergens appear in the allergen input field separated by commas	Expected outcome was met and all three allergens appeared in the input	PASS
Testing that typing an allergen directly into the allergen input matches the tag button state on the Create Product page	Type Gluten into the allergen input field manually	The Gluten tag button highlights with the is-active class to show the manually typed value	Expected outcome was met and the Gluten tag button highlighted after typing it into the input	PASS
Testing that clearing the allergen input deactivates all tag buttons on the Create Product page	No test data	All allergen tag buttons return to their inactive state	Expected outcome was met and all tag buttons deactivated when the input was cleared	PASS
Testing the Back button navigates to the Products main page on the Create Product page	No test data	Upon clicking the Back button the Products main page is loaded	Expected outcome was met and clicking Back loaded the Products main page	PASS

Testing the Create product save button is present on the Create Product page	No test data	The Create product button is visible with a check icon	Expected outcome was met and the button was visible with the icon	PASS
Testing that saving the Create form with all required fields filled saves the product and takes you on the Create Product page	Fill in all required fields with valid data and save	The product is saved and the user is taken to the Products main page	Expected outcome was met and the product was saved and the page change occurred	PASS
Testing that saving the Create form with the Product name field empty shows a validation error on the Create Product page	Leave the Product name field empty and save	A validation error message is shown below the Product name field	Expected outcome was met and the validation error was displayed	PASS
Testing that saving the Create form with the Price field empty shows a validation error on the Create Product page	Leave the Price field empty and save	A validation error message is shown below the Price field	Expected outcome was met and the validation error was displayed	PASS
Testing that the error summary panel appears and lists errors when the form is saved with missing	Save the form without filling in required fields	The error summary panel becomes visible and lists the field-level errors	Expected outcome was met and the error summary panel appeared with the error list	PASS

required fields on the Create Product page				
Testing the Edit Product page is not accessible to non logged in users	No test data	Trying to open the Edit Product page takes you to the login page	Expected outcome was met and accessing the web address loaded the Login page	PASS Testing the Edit Product page is not accessible to standard customer accounts	No test data	Trying to open the Edit Product page loads the Access Denied page	Expected outcome was met and the Access Denied page loaded	PASS Testing the Edit Product page is not accessible to admin accounts	No test data	Trying to open the Edit Product page loads the Access Denied page	Expected outcome was met and the Access Denied page loaded	PASS Testing the Edit Product page is accessible to the producer who owns the product	Log in as the producer who owns the product	The Edit Product page loads and shows the product's current data	Expected outcome was met and the Edit page loaded with the correct product data	PASS
Testing the Edit Product page is accessible to developer accounts	No test data	The Edit Product page loads	Expected outcome was met and the Edit page loaded	PASS

Testing the page title displays as Edit followed by the product name on the Edit Product page	No test data	The browser tab and page heading display Edit followed by the product name	Expected outcome was met and the title displayed with the correct product name	PASS
Testing the navigation trail on the Edit Product page displays Home, Shop, product name, Edit	No test data	The navigation trail displays Home / Shop / (Product Name) / Edit in order	Expected outcome was met and the navigation trail displayed in the correct order	PASS
Testing the product name navigation trail link navigates to the product details page on the Edit Product page	No test data	Upon clicking the product name navigation trail link, the product details page for that product is loaded	Expected outcome was met and clicking the product name navigation trail loaded the correct details page	PASS
Testing all form fields are pre-filled with the existing product data when the Edit Product page loads	No test data	All fields including name, category, image path, description, price, quantity, availability and allergens are pre-filled with the product's current values	Expected outcome was met and all fields displayed the correct existing data	PASS

Testing the product name live preview label updates the image card name display as the user edits on the Edit Product page	Edit the product name field	The image card name label updates as you type as the user types	Expected outcome was met and the name label updated as text was entered	PASS
Testing the existing image is displayed in the image preview card when the Edit Product page loads	Product that has an image set	The image preview card shows the product's current image	Expected outcome was met and the current product image was displayed	PASS
Testing the placeholder image is shown in the image card when the product has no image on the Edit Product page	Product with no image	The image preview card shows the placeholder image	Expected outcome was met and the placeholder icon was shown	PASS
Testing uploading a new image updates the image preview card on the Edit Product page	Upload a new image file	The image preview card updates to show the newly uploaded image and the path label shows the file name	Expected outcome was met and the preview updated to show the uploaded image	PASS
Testing that selecting a different existing image from the dropdown updates	No test data	The image preview updates to show the newly selected image and the path label	Expected outcome was met and the preview updated to the selected image	PASS

the preview on the Edit Product page		updates		
Testing that the uploaded file overrides the existing image dropdown on the Edit Product page	No test data	The uploaded file takes priority and the preview shows the uploaded image	Expected outcome was met and the uploaded image overrode the dropdown selection	PASS
Testing the Price number control add increases the price correctly on the Edit Product page	No test data	The price increases by 0.01 with each click	Expected outcome was met and the price increased correctly	PASS
Testing the Price number control decrement decreases the price correctly on the Edit Product page	No test data	The price decrements by 0.01 with each click	Expected outcome was met and the price decremented correctly	PASS
Testing the Quantity number control add increases the quantity correctly on the Edit Product page	No test data	The quantity adds by 1 with each click	Expected outcome was met and the quantity increases as expected	PASS
Testing the Quantity number control decrement decreases the quantity correctly on the Edit Product	No test data	The quantity decrements by 1 with each click	Expected outcome was met and the quantity decremented correctly	PASS

page				
Testing the Quantity number control cannot decrement below 0 on the Edit Product page	Set quantity to 0 then click the decrement button	The quantity remains at 0	Expected outcome was met and the quantity did not go below 0	PASS
Testing the Listed for sale on/off switch show the product's current availability on the Edit Product page	Product that is listed	The Listed for sale on/off switch is in the checked/on state	Expected outcome was met and the on/off switch showed the current available state	PASS
Testing the Listed for sale on/off switch can be toggled on the Edit Product page	No test data	The on/off switch switches state on each click	Expected outcome was met and the on/off switch changed state correctly	PASS
Testing the allergen tag buttons show the product's existing allergens on page load on the Edit Product page	Product that has Gluten and Milk listed as allergens	The Gluten and Milk tag buttons are highlighted with the is-active class on load	Expected outcome was met and both tag buttons were highlighted to show the existing allergens	PASS

Testing clicking an inactive allergen tag button adds it to the allergen input on the Edit Product page	No test data	The allergen is added to the allergen input and the tag button highlights	Expected outcome was met and the allergen was added to the input	PASS
Testing clicking an active allergen tag button removes it from the allergen input on the Edit Product page	No test data	The allergen is removed from the allergen input and the tag button unhighlights	Expected outcome was met and the allergen was removed from the input	PASS
Testing the Back button navigates to the Products main page on the Edit Product page	No test data	Upon clicking the Back button the Products main page is loaded	Expected outcome was met and the Products page loaded	PASS
Testing the Save changes button submits the form with valid data and takes you on the Edit Product page	Fill all required fields with valid data and click Save changes	The product is updated and the user is taken	Expected outcome was met and the product was updated and page change occurred	PASS
Testing saving the Edit form with the Product name cleared shows a validation error on the Edit Product page	No test data	A validation error is shown for the Product name field	Expected outcome was met and the validation error was displayed	PASS

Testing saving the Edit form with the Description cleared shows a validation error on the Edit Product page	No test data	A validation error is shown for the Description field	Expected outcome was met and the validation error was displayed	PASS
Testing the error summary panel appears when the Edit form is saved with invalid data on the Edit Product page	Save the form with required fields cleared	The error summary panel becomes visible and lists the errors	Expected outcome was met and the error summary panel was displayed with errors	PASS
Testing the Delete Product page is not accessible to non logged in users	No test data	Trying to open the Delete Product page takes you to the login page	Expected outcome was met and accessing the web address loaded the Login page	PASS Testing the Delete Product page is not accessible to standard customer accounts	No test data	Trying to open the Delete Product page loads the Access Denied page	Expected outcome was met and the Access Denied page loaded	PASS Testing the Delete Product page is not accessible to admin accounts	No test data	Trying to open the Delete Product page loads the Access Denied page	Expected outcome was met and the Access Denied page loaded	PASS 
Testing the Delete Product page is accessible to producer accounts	No test data	The Delete Product page loads and shows the product details	Expected outcome was met and the Delete page loaded	PASS
Testing the page title displays as Delete followed by the product name on the Delete Product page	No test data	The browser tab displays Delete - [Product Name]	Expected outcome was met and the title displayed with the correct product name	PASS
Testing the navigation trail on the Delete Product page displays Home, Shop, product name, Delete	No test data	The navigation trail displays Home / Shop / [Product Name] / Delete in order	Expected outcome was met and the navigation trail displayed in the correct order	PASS
Testing the product summary card shows the correct product name on the Delete Product page	No test data	The product name is displayed correctly in the summary card header area	Expected outcome was met and the correct product name was shown	PASS
Testing the product summary card shows the product image when one is set on the Delete Product page	No test data	The product image is displayed in the summary card header area	Expected outcome was met and the product image was shown	PASS

Testing the product summary card shows a category icon when no image is set on the Delete Product page	No test data	A category-specific icon is displayed in the summary card header area instead of a product image	Expected outcome was met and the category icon was shown as a fallback	PASS
Testing the summary card displays the correct category and price details line on the Delete Product page	No test data	The details line in the summary header shows [Category] · £[Price] formatted to 2 decimal places	Expected outcome was met and the category and price were displayed as expected	PASS
Testing the In stock label is shown for products with stock available on the Delete Product page	Quantity bigger than 0 and Available set to true	A green In stock label showing the remaining quantity is displayed	Expected outcome was met and the In stock label was shown with the correct quantity	PASS
Testing the Out of stock label is shown for products with zero quantity on the Delete Product page	Stock quantity equal to 0	A red Out of stock label is displayed in the summary header	Expected outcome was met and the Out of stock label was displayed	PASS
Testing the Unlisted label is shown for products where Available is false on the Delete Product page	Available is false and stock is bigger than 0	An Unlisted label is displayed in the summary header	Expected outcome was met and the Unlisted label was shown	PASS

Testing the Contains allergens label is shown when the product has allergens set on the Delete Product page	No test data	A Contains allergens label with a warning icon is displayed in the summary header	Expected outcome was met and the allergens label was displayed	PASS
Testing the product details rows all show the correct data on the Delete Product page	No test data	The Product name, Category, Price, Stock & availability, Description, Allergens, Image path and Producer rows all display the correct data for the product	Expected outcome was met and all detail rows displayed the correct product information	PASS
Testing the allergen tag buttons row is only shown when the product has allergens on the Delete Product page	No test data	The allergens row is not displayed in the product details section	Expected outcome was met and the allergens row was hidden for a product with no allergens	PASS
Testing the allergen tag buttons display as individual tag button spans in the Delete Product page summary	No test data	Each allergen is displayed as a separate tag button span in the allergen row	Expected outcome was met and each allergen displayed as an individual tag button	PASS

Testing the image path row is only shown when the product has an image set on the Delete Product page	No test data	The image path row is not displayed in the product details section	Expected outcome was met and the image path row was hidden	PASS
Testing the impact warning panel is displayed on the Delete Product page	No test data	The What will be permanently deleted panel is visible with a warning icon and lists the product listing, basket entries and order records as items to be deleted	Expected outcome was met and the impact warning panel was displayed with all items listed	PASS
Testing the Delete button is disabled by default on the Delete Product page	No test data	The Delete permanently button is displayed with the disabled attribute and disabled state set to true	Expected outcome was met and the button was disabled on page load	PASS
Testing the confirmation checkbox is unchecked by default on the Delete Product page	No test data	The confirmation checkbox is in the unchecked state on page load	Expected outcome was met and the checkbox was unchecked by default	PASS

Testing that checking the confirmation checkbox enables the Delete button on the Delete Product page	Check the ‘I understand’ confirmation checkbox	The Delete permanently button becomes enabled and the active class is applied	Expected outcome was met and the button became enabled after the checkbox was checked	PASS
Testing that unchecking the confirmation checkbox disables the Delete button on the Delete Product page	Check then uncheck the confirmation checkbox	The Delete permanently button returns to the disabled state	Expected outcome was met and the button was disabled again when the checkbox was unchecked	PASS
Testing that saving the Delete form permanently removes the product from the database	Check the confirmation checkbox and click Delete permanently	The product is deleted from the database and the user is taken to the Products main page	Expected outcome was met and the product was deleted and the page change occurred	PASS
Testing the Cancel button navigates back to the product Details page on the Delete Product page	No test data	The product Details page for that product is loaded	Expected outcome was met and clicking Cancel loaded the correct Details page	PASS
Testing the Product Details page loads correctly for a valid product ID	Valid product details web address	The product details page loads and displays the product information	Expected outcome was met and the product details page loaded	PASS

Testing the Product Details page returns a not found error page for an invalid product ID	Navigate to a product details web address with a non-existent ID	A not found error page or error page is returned	Expected outcome was met and a not found error page or error page was shown for the invalid ID	PASS
Testing the page title displays as the product name on the Product Details page	No test data	The browser tab displays the product name	Expected outcome was met and the title was set to the product name	PASS
Testing the navigation trail displays Home, Shop, Category, product name on the Product Details page	Product with a category set	The navigation trail displays Home / Shop / [Category] / [Product Name] in order	Expected outcome was met and all parts of the navigation trail are shown as expected	PASS
Testing the navigation trail category part is hidden when the product has no category on the Product Details page	Product with no category	The navigation trail displays Home / Shop / [Product Name] without the category part	Expected outcome was met and the category part was not shown	PASS

Testing the product image is displayed in the image card when the product has an image on the Product Details page	No test data	The product image is displayed in the image card at full aspect ratio	Expected outcome was met and the image was displayed as expected	PASS
Testing the placeholder image is shown in the image card when the product has no image on the Product Details page	No test data	The image card displays the placeholder image	Expected outcome was met and the placeholder was shown	PASS
Testing the 'Fresh Pick' sticker is shown for in-stock products with sufficient stock on the Product Details page	Product available with quantity bigger than 5	A green Fresh Pick sticker with a sparkle like icon is displayed on the image card	Expected outcome was met and the Fresh Pick sticker was shown	PASS
Testing the Only (x amount) left sticker is shown when product has low stock on the Product Details page	Quantity between 1 and 5	An orange Only (x amount) left sticker with a zap icon is shown on the image card	Expected outcome was met and the low stock sticker showed the correct quantity	PASS
Testing the Unavailable sticker is shown when the product is not	Product where Available is false	A grey Unavailable sticker is shown on the image card	Expected outcome was met and the Unavailable sticker was displayed	PASS

available on the Product Details page				
Testing the category sticker is shown in the bottom-right of the image card on the Product Details page	No test data	A yellow category sticker is shown in the bottom right corner of the image card	Expected outcome was met and the category sticker was shown in the correct position	PASS
Testing the interactive tilt effect and shadow reset when the mouse leaves the image card on the Product Details page	No test data	The card transform and shadow reset to their default values	Expected outcome was met and the card reset on mouse leave	PASS

Testing the Out of Stock label is shown in the product information section when quantity is 0 on the Product Details page	Product quantity equal to 0	A red Out of Stock label is shown	Expected outcome was met and the Out of Stock label was displayed	PASS
Testing the Unavailable label is shown in the product information section when Available is false on the Product Details page	Product Available boolean is false	A grey Unavailable label is shown	Expected outcome was met and the Unavailable label was displayed	PASS

Testing the product name heading displays correctly on the Product Details page	No test data	The product name is displayed in the main page heading	Expected outcome was met and the product name heading displayed as expected	PASS
Testing the producer name row is displayed with the location pin icon on the Product Details page	No test data	The By [Producer Name] row with a location pin icon is visible under the product name	Expected outcome was met and the producer row was displayed as expected	PASS
Testing the price block displays the formatted price with GBP symbol on the Product Details page	No test data	The price is shown as £[price] per unit · inc. VAT formatted to 2 decimal places	Expected outcome was met and the price was formatted and displayed as expected	PASS
Testing the product description is displayed on the Product Details page	No test data	The product description text is visible in the product information section	Expected outcome was met and the description was displayed	PASS
Testing the allergen section is displayed when the product has allergens on the Product Details page	No test data	The Contains allergens section is shown with individual allergen tag buttons	Expected outcome was met and the allergen section was displayed	PASS

Testing the allergen section is hidden when the product has no allergens on the Product Details page	No test data	The allergens section is not displayed in the product information section	Expected outcome was met and the allergens section was not shown	PASS
Testing each allergen is displayed as an individual tag button on the Product Details page	No test data	Each allergen is shown as a separate tag button element	Expected outcome was met and each allergen displayed as an individual tag button	PASS
Testing the In stock and ready to go stock status message is shown for in-stock products on the Product Details page	No test data	The stock status row shows (x amount) in stock and ready to go with a tick icon	Expected outcome was met and the in-stock message was shown with the correct quantity	PASS
Testing the Only (x amount) left stock status message is shown for low-stock products on the Product Details page	Product has 1 to 5 units in stock	The stock status row shows Only (x amount) left with a zap icon	Expected outcome was met and the low-stock message was shown with the correct quantity	PASS
Testing the Out of stock check back soon status message is shown when quantity is 0 on the Product Details page	Stock quantity equal to 0	The stock status row shows Out of stock with a cross icon	Expected outcome was met and the out of stock message was shown	PASS

Testing the Currently unavailable status message is shown when Available is false on the Product Details page	No test data	The stock status row shows Currently unavailable from this producer with a cross icon	Expected outcome was met and the unavailable message was shown	PASS
Testing the Add to basket section with quantity controls and Add to Basket button is shown for in-stock products on the Product Details page	In stock product as logged in user	The quantity control with decrement and add buttons and the Add to Basket button are visible	Expected outcome was met and the add to basket controls were displayed	PASS
Testing the Add to basket area is replaced with a disabled Unavailable button for unavailable products on the Product Details page	No test data	A disabled Unavailable button is shown instead of the add to basket controls	Expected outcome was met and the disabled button was shown	PASS
Testing the Add to basket area is replaced with a disabled Out of Stock button when quantity is 0 on the Product Details page	No test data	A disabled Out of Stock button is shown instead of the add to basket controls	Expected outcome was met and the disabled Out of Stock button was shown	PASS

Testing the quantity decrement button on the Details page cannot reduce quantity below 1	No test data	The displayed quantity stays at 1 and doesn't go below 1	Expected outcome was met and the quantity stayed at 1	PASS
Testing the quantity add button on the Details page cannot increase quantity above 99	Increase quantity to 99 and click add again	The displayed quantity stays at 99	Expected outcome was met and the quantity stayed at 99	PASS
Testing the Add to Basket button shows a loading spinner while the background request is in progress on the Product Details page	No test data	The button is disabled and displays a spinner while the request processes	Expected outcome was met and the spinner was displayed during the request	PASS
Testing the Add to Basket button turns green with a tick on a successful background request on the Product Details page	No test data	The button turns green and displays a tick before reverting	Expected outcome was met and the button turned green with a tick after success	PASS
Testing the basket label in the navigation bar updates after a successful Add to	No test data	The basket label count in the navigation bar updates to show the new total	Expected outcome was met and the label count updated correctly	PASS

Basket on the Product Details page				
Testing a confetti burst effect plays from the Add to Basket button on a successful save action on the Product Details page	No test data	Coloured confetti particles burst outward from the Add to Basket button after a successful add	Expected outcome was met and the confetti burst played after the item was added	PASS
Testing the Add to Basket success pop-up confirmation message appears and auto-dismisses on the Product Details page	No test data	A pop-up confirmation message appears confirming the item was added then fades out after approximately 2.8 seconds	Expected outcome was met and the pop-up message appeared and dismissed correctly	PASS
Testing the Add to Basket success pop-up message shows the quantity when more than 1 is added on the Product Details page	Set quantity to 3 and click Add to Basket	The pop-up message shows 3x [Product Name] added to basket!	Expected outcome was met and the pop-up message displayed the quantity correctly	PASS

Testing the producer info card is displayed with the producer name and bio on theProduct Details page	Product with producer with bio information	The producer card shows the producer name, a truncated bio and a See all their products link	Expected outcome was met and the producer card was displayed with the correct information	PASS
Testing the See all their products link navigates to the Producers main page on the Product Details page	No test data	The Producers main page is loaded	Expected outcome was met and the Producers page loaded	PASS
Testing the producer admin controls are visible on the Product Details page for producer accounts	No test data	The Edit and Delete admin links and the Back to my products link are displayed below the producer card	Expected outcome was met and the producer admin links were visible	PASS
Testing the producer admin controls are not visible for standard customer accounts on the Product Details page	No test data	The producer Edit and Delete admin links are not displayed	Expected outcome was met and the admin controls were not shown for standard customers	PASS
Testing the producer admin controls are not visible for non logged in users on the Product Details	No test data	The producer Edit and Delete admin links are not displayed	Expected outcome was met and the admin controls were not shown to non logged in users	PASS

page				
Testing the Edit admin link navigates to the Edit Product page on the Product Details page	No test data	The Edit Product page for this product is loaded	Expected outcome was met and the Edit page loaded	PASS
Testing the Delete admin link navigates to the Delete Product page on the Product Details page	No test data	The Delete Product page for this product is loaded	Expected outcome was met and the Delete page loaded	PASS
Testing the Back to shop link is shown for non-producer users on the Product Details page	No test data	A Back to shop link is visible below the producer card	Expected outcome was met and the Back to shop link was shown	PASS
Testing the More from this producer section is displayed when other products from the same producer exist on the Product Details page	No test data	The More from [Producer Name] section is shown below the main product section	Expected outcome was met and the more from producer section was displayed	PASS

Testing the More from this producer section is hidden when the product is the only one from that producer on the Product Details page	No test data	The More from this producer section is not displayed	Expected outcome was met and the section was hidden	PASS
Testing the related product cards in the More from this producer section display stock labels correctly on the Product Details page	No test data	Each related card shows the correct stock label matching its availability state	Expected outcome was met and the correct labels were shown on each related card	PASS
Testing the Add to Basket popping animation works correctly on related product cards in the More from this producer section on the Product Details page	Log in as standard user, click Add on a related product card	The item is added to the basket, popping animation plays and the basket label updates	Expected outcome was met and the basket was updated and the animation appeared	PASS
Testing the View details link on related product cards navigates to the correct product page on the Product	No test data	The correct product details page for that product is loaded	Expected outcome was met and the correct product page loaded	PASS

Details page				
Testing the See all products button in the More from this producer section navigates you to the Products main listing on the Product Details page	No test data	The Products main page is loaded	Expected outcome was met and the Products page loaded	PASS
Testing the Orders page is not accessible to non logged in users	No test data	Trying to open the Orders page takes you to the login page	Expected outcome was met and attempting to access the Orders page took the user to the login page	PASS Testing the Orders page is accessible to standard customer accounts	No test data	The Orders page loads and displays that customer's orders	Expected outcome was met and the Orders page loaded and displayed that customer's orders	PASS
Testing the Orders page is accessible to admin accounts	No test data	The Orders page loads and displays all orders across every customer	Expected outcome was met and the Orders page loaded and displayed all orders across every customer	PASS

Testing the Orders page is accessible to producer accounts	No test data	The Orders page loads and displays orders containing that producer's products	Expected outcome was met and the Orders page loaded and displayed orders containing that producer's products	PASS
Testing the Orders page shows the correct heading for a standard customer	No test data	The page heading displays Your Orders and the badge reads Order History	Expected outcome was met and the page heading displayed Your Orders and the badge reads Order History	PASS
Testing the Orders page shows the correct heading for an admin	No test data	The page heading displays Order Dashboard and the badge reads Admin - All Orders	Expected outcome was met and the page heading displayed Order Dashboard and the badge reads Admin - All Orders	PASS
Testing the Orders page shows the correct heading for a producer	No test data	The page heading displays Your Orders and the badge reads Producer Dashboard	Expected outcome was met and the page heading displayed Your Orders and the badge reads Producer Dashboard	PASS

Testing the stats bar shows the correct total order count on the Orders page	Log in as standard user with existing orders	The Total Orders stat displays the correct number of orders for that account	Expected outcome was met and the Total Orders stat displayed the correct number of orders for that account	PASS
Testing the stats bar shows the correct active order count on the Orders page	Log in as standard user with at least one non-delivered order	The Active stat displays the correct count of orders not yet marked as Delivered	Expected outcome was met and the Active stat displayed the correct count of orders not yet marked as Delivered	PASS
Testing the stats bar shows the correct total spent on the Orders page	Log in as standard user with existing orders	The Total Spent stat displays the correct sum of all order totals formatted to 2 decimal places	Expected outcome was met and the Total Spent stat displayed the correct sum of all order totals formatted to 2 decimal places	PASS
Testing the Free Delivery stat is shown for standard customers on the Orders page	No test data	The Free Delivery stat is visible and shows either the number of orders away or Next order! when eligible	Expected outcome was met and the Free Delivery stat was visible and showed either the number of orders away or Next order! when eligible	PASS

Testing the Free Delivery stat is not shown for admin accounts on the Orders page	No test data	The Free Delivery stat is not displayed in the stats bar	Expected outcome was met and the Free Delivery stat was not displayed in the stats bar	PASS
Testing the Free Delivery stat is not shown for producer accounts on the Orders page	No test data	The Free Delivery stat is not displayed in the stats bar	Expected outcome was met and the Free Delivery stat was not displayed in the stats bar	PASS
Testing the empty state is shown when the account has no orders on the Orders page	No test data	The No orders yet message is displayed along with a Shop the Harvest button	Expected outcome was met and the No orders yet message was displayed along with a Shop the Harvest button	PASS
Testing the Products page 'the Harvest' button on the empty state navigates to the Products page	No test data	Upon clicking Shop the Harvest, the Products page is loaded	Expected outcome was met and upon clicking Shop the Harvest, the Products page loaded	PASS
Testing the search bar filters orders by order number on the Orders page	Search: enter the full order number e.g. PF-000001	Only orders whose reference matches the search are displayed	Expected outcome was met and only orders whose reference matched the search are displayed	PASS

Testing the search bar filters orders using a partial order number on the Orders page	Search: enter a partial order number e.g. 000	All orders whose reference contains those characters are displayed	Expected outcome was met and all orders whose reference contains those characters are displayed	PASS
Testing the search bar with no matching order number shows the no results state on the Orders page	Search: enter a string that matches no orders e.g. zzzz	No order cards are shown and the No orders match empty state is displayed	Expected outcome was met and no order cards are shown and the No orders match empty state was displayed	PASS
Testing clearing the search bar restores all orders on the Orders page	No test data	All orders are shown again once the search input is cleared	Expected outcome was met and all orders are shown again once the search input is cleared	PASS
Testing the Most Recent sort option on the Orders page	Sort: Most Recent	Orders are displayed with the most recently placed order first	Expected outcome was met and orders are displayed with the most recently placed order first	PASS
Testing the Oldest First sort option on the Orders page	Sort: Oldest First	Orders are displayed with the oldest placed order first	Expected outcome was met and orders are displayed with the oldest placed order first	PASS

Testing the Highest Value sort option on the Orders page	Sort: Highest Value	Orders are displayed with the highest order total first	Expected outcome was met and orders are displayed with the highest order total first	PASS
Testing the Lowest Value sort option on the Orders page	Sort: Lowest Value	Orders are displayed with the lowest order total first	Expected outcome was met and orders are displayed with the lowest order total first	PASS
Testing the All filter shows every order on the Orders page	Filter: All	All order cards are displayed regardless of their status	Expected outcome was met and all order cards are displayed regardless of their status	PASS
Testing the Pending filter shows only pending orders on the Orders page	Filter: Pending	Only order cards with a Pending status are displayed	Expected outcome was met and only order cards with a Pending status are displayed	PASS
Testing the Preparing filter shows only orders being prepared on the Orders page	Filter: Preparing	Only order cards with a Preparing Delivery status are displayed	Expected outcome was met and only order cards with a Preparing Delivery status are displayed	PASS
Testing the Awaiting filter shows only orders awaiting confirmation on the	Filter: Awaiting	Only order cards with an Awaiting Confirmation status are displayed	Expected outcome was met and only order cards with an Awaiting	PASS

Orders page			Confirmation status are displayed	
Testing the Delivered filter shows only delivered orders on the Orders page	Filter: Delivered	Only order cards with a Delivered status are displayed	Expected outcome was met and only order cards with a Delivered status are displayed	PASS
Testing the Clear filters button resets all active filters on the Orders page	Apply any filter and search term, then click Clear filters	All filters are cleared and all orders are shown again	Expected outcome was met and all filters are cleared and all orders are shown again	PASS
Testing order cards show the correct order reference, status and total on the Orders page	Log in as standard user with existing orders	Each order card displays the formatted order reference, status and order total correctly	Expected outcome was met and each order card displayed the formatted order reference, status and order total correctly	PASS
Testing order cards show the correct order date and fulfilment method on the Orders page	Log in as standard user with both delivery and collection orders	Cards show the order date, and either Delivery or Collection with the relevant method detail	Expected outcome was met and cards show the order date, and either Delivery or Collection with the relevant method detail	PASS

Testing the Details button on each order card navigates to the correct Order Details page	No test data	Upon clicking, the correct order's Details page is loaded	Expected outcome was met and upon clicking, the correct order's Details page loaded	PASS
Testing the Re-order button is visible to standard customer accounts on the Orders page	No test data	The Re-order button is visible on each order card	Expected outcome was met and the Re-order button was visible on each order card	PASS
Testing the Re-order button is not visible to admin accounts on the Orders page	No test data	The Re-order button is not displayed on any order card	Expected outcome was met and the Re-order button was not displayed on any order card	PASS
Testing the Re-order button is not visible to producer accounts on the Orders page	No test data	The Re-order button is not displayed on any order card	Expected outcome was met and the Re-order button was not displayed on any order card	PASS
Testing the Edit and Delete buttons are visible to admin accounts on the Orders page	No test data	The Edit and Delete buttons are visible on each order card	Expected outcome was met and the Edit and Delete buttons are visible on each order card	PASS
Testing the Edit and Delete buttons are not visible to standard customer	No test data	The Edit and Delete buttons are not displayed on any order card	Expected outcome was met and the Edit and Delete buttons are not displayed on	PASS

accounts on the Orders page			any order card	
Testing the Confirm Delivery button is shown for orders awaiting confirmation on the Orders page	Log in as standard user with an order at Awaiting Confirmation status	The Confirm Delivery button is visible on the relevant order card	Expected outcome was met and the Confirm Delivery button was visible on the relevant order card	PASS
Testing the Confirm Delivery button successfully marks the order as delivered on the Orders page	No test data	The order status updates to Delivered and the Confirm Delivery button is no longer shown	Expected outcome was met and the order status updated to Delivered and the Confirm Delivery button is no longer shown	PASS
Testing the Checkout page is not accessible to non logged in users	No test data	Trying to open the Checkout page takes you to the login page	Expected outcome was met and attempting to access the Checkout page took the user to the login page	PASS Testing the Checkout page is not accessible to producer accounts	No test data	Trying to open the Checkout page loads the Access Denied page	Expected outcome was met and attempting to access the Checkout page via web address loaded the Access	PASS 
			Denied page	
Testing the Checkout page is not accessible to admin accounts	No test data	Trying to open the Checkout page loads the Access Denied page	Expected outcome was met and attempting to access the Checkout page via web address loaded the Access Denied page	PASS Testing the Checkout page is accessible to standard customer accounts	Log in as standard user with items in the basket	The Checkout page loads and displays the order form	Expected outcome was met and the Checkout page loaded and displayed the order form	PASS
Testing selecting Delivery on the Checkout page shows the delivery options section	No test data	The delivery speed selection section appears with Next Day, Standard and Economy options	Expected outcome was met and the delivery speed selection section appeared with Next Day, Standard and Economy options	PASS

Testing the VAT breakdown is not shown for non-VAT-registered producers on the Confirmation page	Place an order containing a product from a producer who is not VAT-registered	No VAT breakdown is shown for that producer's section	Expected outcome was met and no VAT breakdown was shown for that producer's section	PASS
Testing the delivery address is displayed on the Confirmation page for delivery orders	Place an order with Delivery selected	The delivery address entered at checkout is shown properly in the fulfilment details panel	Expected outcome was met and the delivery address entered at checkout was shown as we expected in the fulfilment details panel	PASS
Testing the collection date is displayed on the Confirmation page for collection orders	Place an order with Collection selected	The collection date selected at checkout is shown in the fulfilment details panel	Expected outcome was met and the collection date selected at checkout was shown in the fulfilment details panel	PASS

Testing the View My Orders button on the Confirmation page navigates to the Orders page	No test data	Upon clicking, the Orders page is loaded	Expected outcome was met and upon clicking, the Orders page loaded	PASS
Testing the Continue Shopping button on the Confirmation page navigates to the Products page	No test data	Upon clicking, the Products page is loaded	Expected outcome was met and upon clicking, the Products page loaded	PASS
Testing the Order Details page is not accessible to non logged in users	No test data	Trying to open the Order Details page takes you to the login page	Expected outcome was met and attempting to access the Order Details page took the user to the login page	PASS Testing the Order Details page is not accessible to a customer viewing another customer's order	Log in as standard user, attempt to access a different customer's order via web address	The Access Denied page or not found error page is loaded	Expected outcome was met and the Access Denied page or not found error page loaded	PASS Testing the Order Details page loads properly for the customer who placed the order	Log in as the customer who placed the order	The Order Details page loads and displays the proper order information	Expected outcome was met and the Order Details page loaded and displayed the correct order information	PASS

Testing the Order Details page loads correctly for admin accounts	No test data	The Order Details page loads and displays the order information for any order	Expected outcome was met and the Order Details page loaded and displayed the order information for any order	PASS
Testing the order items table on the Order Details page shows the proper product name, quantity, unit price and line total	Navigate to the Order Details page for an order with multiple products	Each row in the items table shows the correct product name, quantity, unit price and calculated line total	Expected outcome was met and each row in the items table showed the expected product name, quantity, unit price and calculated line total	PASS
Testing the delivery address is shown on the Order Details page for delivery orders	Navigate to the Order Details page for a delivery order	The delivery address is shown correctly in the order journey panel	Expected outcome was met and the delivery address was shown as expected in the order journey panel	PASS
Testing the billing address is shown on the Order Details page	Navigate to the Order Details page for any order	The billing address is displayed correctly in the order journey panel	Expected outcome was met and the billing address was displayed as expected in the order journey panel	PASS

Testing the tracking status is displayed properly on the Order Details page	Navigate to the Order Details page for orders with each possible status	The status label matches the current tracking status of the order	Expected outcome was met and the status label matched the current tracking status of the order	PASS
Testing the Back to Orders link on the Order Details page navigates to the Orders page	No test data	Upon clicking, the Orders page is loaded	Expected outcome was met and upon clicking, the Orders page loaded	PASS
Testing the Shop Again link on the Order Details page navigates to the Products page	No test data	Upon clicking, the Products page is loaded	Expected outcome was met and upon clicking, the Products page loaded	PASS
Testing the Order Details page shows a not found message for an invalid order ID	Navigate to the Order Details page with a non-existent order ID in the web address	The We could not find that order message is displayed with a Back to Orders button	Expected outcome was met and the We could not find that order message was displayed with a Back to Orders button	PASS
Testing the Back to Orders button on the not found state navigates to the Orders page	Navigate to the Order Details page with an invalid order ID and click Back to Orders	Upon clicking, the Orders page is loaded	Expected outcome was met and upon clicking, the Orders page loaded	PASS

Testing the Admin Dashboard is not accessible to non logged in users	No test data	Trying to open the Admin Dashboard takes you to the login page	Expected outcome was met and accessing the web address took the user to the login page	PASS Testing the Admin Dashboard is not accessible to standard customer accounts	No test data	Trying to open the Admin Dashboard loads the Access Denied page	Expected outcome was met and the Access Denied page loaded	PASS Testing the Admin Dashboard is not accessible to producer accounts	No test data	Trying to open the Admin Dashboard loads the Access Denied page	Expected outcome was met and the Access Denied page loaded	PASS Testing the Admin Dashboard is accessible to admin accounts	No test data	The Admin Dashboard Overview page loads correctly	Expected outcome was met and the Admin Dashboard loaded	PASS
Testing the Overview page shows the correct stats for users, orders, revenue and low stock	No test data	The stats bar displays the correct totals for users, orders, revenue and low stock items	Expected outcome was met and all stats displayed the expected numbers	PASS
Testing the Recent orders table on the Overview page shows the latest orders	Log in as admin with existing orders in the system	The recent orders table displays order reference, date, items, total and	Expected outcome was met and the recent orders table displayed the	PASS

		status correctly	expected data	
Testing the View all link on the Overview page navigates to the Orders page	No test data	Upon clicking, the Admin Orders page is loaded	Expected outcome was met and the Admin Orders page loaded	PASS
Testing the Top products panel on the Overview page shows the correct products	Log in as admin with orders containing products	The top products panel lists products ranked by the number of times they have been ordered	Expected outcome was met and the top products panel displayed as expected	PASS
Testing the All link on the Top products panel navigates to the Admin Products page	No test data	Upon clicking, the Admin Products page is loaded	Expected outcome was met and the Admin Products page loaded	PASS
Testing the search bar filters orders by order number on the Admin Orders page	Search: enter a full or partial order number	Only orders whose reference contains the search term are displayed	Expected outcome was met and only matching orders were displayed	PASS
Testing the search bar filters orders by user ID on the Admin Orders page	Search: enter a user ID	Only orders belonging to that user ID are displayed	Expected outcome was met and only that user's orders were shown	PASS

Testing the Order Status filter on the Admin Orders page	No test data	Only orders with the selected order status are displayed	Expected outcome was met and only matching orders were shown	PASS
Testing the Tracking Status filter on the Admin Orders page	No test data	Only orders with the selected tracking status are displayed	Expected outcome was met and only matching orders were shown	PASS
Testing the Sort dropdown on the Admin Orders page	No test data	Orders are reordered according to the selected sort option	Expected outcome was met and orders were sorted correctly	PASS
Testing the Clear button resets all filters on the Admin Orders page	Apply any combination of filters then click Clear	All filters are cleared and all orders are displayed again	Expected outcome was met and all orders were shown after clearing	PASS
Testing the View button on each order row navigates to the Order Details page	No test data	Upon clicking, the correct Order Details page is loaded	Expected outcome was met and the correct Order Details page loaded	PASS
Testing the tracking status dropdown on each order row updates the order's tracking status	Change the tracking status dropdown on any order row	The order's tracking status is updated and the page displays the change	Expected outcome was met and the tracking status updated expectedly	PASS

Testing the no results message is shown when filters match no orders on the Admin Orders page	Apply filters that match no orders	The no orders match message is displayed	Expected outcome was met and the no results message was shown	PASS
Testing the search bar filters products by name, category or producer on the Admin Products page	Search: enter a product name, category or producer name	Only products matching the search term are displayed	Expected outcome was met and only matching products were displayed	PASS
Testing the Category filter on the Admin Products page	No test data	Only products in the selected category are displayed	Expected outcome was met and only products in that category were shown	PASS
Testing the Availability filter on the Admin Products page	No test data	Only products matching the selected availability are displayed	Expected outcome was met and only matching products were shown	PASS
Testing the Sort filter on the Admin Products page	No test data	Products are reordered according to the selected sort option	Expected outcome was met and products were sorted correctly	PASS
Testing the Clear button resets all filters on the Admin Products page	Apply any filters then click Clear	All filters are cleared and all products are displayed again	Expected outcome was met and all products were shown after clearing	PASS

Testing the availability on/off switch updates the product's availability on the Admin Products page	Toggle the availability on/off switch on any product row	The product's availability is updated in the database and the switch shows the new state	Expected outcome was met and the availability updated correctly	PASS
Testing the View button on each product row navigates to the Product Details page	No test data	Upon clicking, the correct Product Details page is loaded	Expected outcome was met and the correct Product Details page loaded	PASS
Testing the Edit button on each product row navigates to the Edit Product page	No test data	Upon clicking, the correct Edit Product page is loaded	Expected outcome was met and the correct Edit Product page loaded	PASS
Testing the Delete button on each product row removes the product on the Admin Products page	No test data	The product is removed from the list and no longer appears	Expected outcome was met and the product was removed from the list	PASS
Testing the Add product button navigates to the Create Product page on the Admin Products page	No test data	Upon clicking, the Create Product page is loaded	Expected outcome was met and the Create Product page loaded	PASS

Testing the search bar filters producers by name or email on the Admin Producers page	Search: enter a producer name or email	Only producers whose name or email contains the search term are displayed	Expected outcome was met and only matching producers were displayed	PASS
Testing the Clear button resets the search on the Admin Producers page	No test data	The search is cleared and all producers are displayed again	Expected outcome was met and all producers were shown after clearing	PASS
Testing the View button on each producer row navigates to the Producer Details page	No test data	Upon clicking, the correct Producer Details page is loaded	Expected outcome was met and the correct Producer Details page loaded	PASS
Testing the Edit button on each producer row navigates to the Edit Producer page	No test data	Upon clicking, the correct Edit Producer page is loaded	Expected outcome was met and the correct Edit Producer page loaded	PASS
Testing the Create Producer button navigates to the Create Producer page on the Admin Producers page	No test data	Upon clicking, the Create Producer page is loaded	Expected outcome was met and the Create Producer page loaded	PASS

Testing the search bar filters users by email or username on the Admin Users page	Search: enter an email address or username	Only users whose email or username contains the search term are displayed	Expected outcome was met and only matching users were displayed	PASS
Testing the Role filter on the Admin Users page	No test data	Only users with the selected role are displayed	Expected outcome was met and only users with that role were shown	PASS
Testing the Clear button resets all filters on the Admin Users page	Apply a search or role filter then click Clear	All filters are cleared and all users are displayed again	Expected outcome was met and all users were shown after clearing	PASS
Testing the Assign Role dropdown and button adds a role to a user on the Admin Users page	No test data	The selected role is added to the user and appears in their roles list	Expected outcome was met and the role was added correctly	PASS
Testing the remove role button removes a role from a user on the Admin Users page	No test data	The role is removed from the user and no longer appears in their roles list	Expected outcome was met and the role was removed correctly	PASS
Testing the Create roles first link on the Admin Users page navigates to the Settings page	No test data	Upon clicking, the Admin Settings page is loaded	Expected outcome was met and the Admin Settings page loaded	PASS

Testing the Create role input field is required on the Admin Settings page	Leave the role name field empty and click Create	The form don’t save and a validation error or browser prompt is shown	Expected outcome was met and the form did not save without a role name	PASS
Testing the Create role form adds a new role on the Admin Settings page	Enter a valid role name and click Create	The new role is added and appears in the roles list	Expected outcome was met and the new role appeared in the list	PASS
Testing the quick links on the Admin Settings page navigate to the correct pages	No test data	Each link opens the correct page	Expected outcome was met and each link navigated to the correct page	PASS
Testing the Producer Dashboard page is accessible to producer accounts	No test data	Producer Dashboard page is loaded	Expected outcome was met and the Producer Dashboard page loaded	PASS
Testing the Producer Dashboard page is accessible to developer accounts	No test data	Producer Dashboard page is loaded	Expected outcome was met and the Producer Dashboard page loaded	PASS
Testing the Producer Dashboard page is not accessible by non logged in users	No test data	Login page is loaded	Expected outcome was met and the Login page loaded	PASS 
Testing the page heading on the Producer Dashboard page	No test data	Welcome back heading is shown	Expected outcome was met and the welcome heading was shown	PASS
Testing the Add product button on the Producer Dashboard page	No test data	Create Product page is loaded	Expected outcome was met and the Create Product page loaded	PASS
Testing the View shop button on the Producer Dashboard page	No test data	Products page is loaded	Expected outcome was met and the Products page loaded	PASS
Testing the stat cards are shown on the Producer Dashboard page	No test data	Stats are displayed	Expected outcome was met and the stats were displayed	PASS
Testing the Recent orders section on the Producer Dashboard page	Log in as producer with orders	Recent orders section is displayed	Expected outcome was met and the Recent orders section was displayed	PASS
Testing the View all link on the Producer Dashboard page	Log in as producer with orders	All orders page is loaded	Expected outcome was met and the All orders page loaded	PASS
Testing the Accept button is shown for pending orders on the Producer	Log in as producer with pending orders	Accept button is displayed	Expected outcome was met and the Accept button was displayed	PASS

Dashboard page				
Testing the Cancel button is shown for pending orders on the Producer Dashboard page	Log in as producer with pending orders	Cancel button is displayed	Expected outcome was met and the Cancel button was displayed	PASS
Testing the Accept button on the Producer Dashboard page	Log in as producer with pending orders	Order status changes to Accepted	Expected outcome was met and the order status changed to Accepted	PASS
Testing the Cancel button on the Producer Dashboard page	Log in as producer with pending orders	Cancel order page is loaded	Expected outcome was met and the Cancel order page loaded	PASS
Testing the All orders page is accessible to producer accounts	No test data	All orders page is loaded	Expected outcome was met and the All orders page loaded	PASS
Testing the All orders page is accessible to developer accounts	No test data	All orders page is loaded	Expected outcome was met and the All orders page loaded	PASS

Testing the All orders page is not accessible by standard users	No test data	Access Denied page is loaded	Expected outcome was met and the Access Denied page loaded	PASS Testing the All orders page is not accessible by non logged in users	No test data	Login page is loaded	Expected outcome was met and the Login page loaded	PASS
Testing the Dashboard breadcrumb link on the All orders page	No test data	Producer Dashboard page is loaded	Expected outcome was met and the Producer Dashboard page loaded	PASS
Testing the All filter button on the All orders page	Log in as producer with orders	All orders are shown	Expected outcome was met and all orders were shown	PASS
Testing the Pending filter button on the All orders page	Log in as producer with pending orders	Pending orders are shown	Expected outcome was met and only pending orders were shown	PASS
Testing the Accepted filter button on the All orders page	Log in as producer with accepted orders	Accepted orders are shown	Expected outcome was met and only accepted orders were shown	PASS
Testing the Cancelled filter button on the All orders page	Log in as producer with cancelled orders	Cancelled orders are shown	Expected outcome was met and only cancelled orders were shown	PASS

Testing the Cancel order page is accessible to producer accounts	No test data	Cancel order page is loaded	Expected outcome was met and the Cancel order page loaded	PASS
Testing the Cancel order page is not accessible by standard users	No test data	Access Denied page is loaded	Expected outcome was met and the Access Denied page loaded	PASS Testing the Cancel order page is not accessible by non logged in users	No test data	Login page is loaded	Expected outcome was met and the Login page loaded	PASS Testing the Back to dashboard button on the Cancel order page	No test data	Producer Dashboard page is loaded	Expected outcome was met and the Producer Dashboard page loaded	PASS
Testing the Remove button on the Cancel order page	Log in as producer with order items	Selected item is removed	Expected outcome was met and the selected item was removed	PASS

Testing the Cancel entire order slice button on the Cancel order page	Log in as producer with order items	Order slice is cancelled	Expected outcome was met and the order slice was cancelled	PASS
Testing the About navigation button in navigation bar	No test data	About Us page is loaded	Expected outcome was met and the About Us page loaded	PASS
Testing the Contact navigation button in navigation bar	No test data	Contact Us page is loaded	Expected outcome was met and the Contact Us page loaded	PASS
Testing the About Us navigation link in page footer	No test data	About Us page is loaded	Expected outcome was met and the About Us page loaded	PASS
Testing the Contact Us navigation link in page footer	No test data	Contact Us page is loaded	Expected outcome was met and the Contact Us page loaded	PASS
Testing the About Us page loads	No test data	About Us page is loaded	Expected outcome was met and the About Us page loaded	PASS
Testing the ‘Explore the shop’ button on the About Us page	No test data	Products page is loaded	Expected outcome was met and the Products page loaded	PASS

Testing the ‘Meet our growers’ button on the About Us page	No test data	Producers page is loaded	Expected outcome was met and the Producers page loaded	PASS
Testing the ‘Our story jump’ link on the About Us page	No test data	Our story section is shown	Expected outcome was met and the Our story section was shown	PASS
Testing the ‘Our values' jump link on the About Us page	No test data	Our values section is shown	Expected outcome was met and the Our values section was shown	PASS Testing the ‘Our impact’ jump link on the About Us page	No test data	Our impact section is shown	Expected outcome was met and the Our impact section was shown	PASS Testing the Contact Us page loads for non logged in users	No test data	Contact Us page is loaded	Expected outcome was met and the Contact Us page loaded	PASS
Testing the Contact Us page loads for logged in users	No test data	Contact Us page is loaded	Expected outcome was met and the Contact Us page loaded	PASS
Testing the Full name field on the Contact Us page	Full name: Jamie Smith	Text is accepted	Expected outcome was met and the text was accepted	PASS

Testing the Email address field on the Contact Us page as a non logged in user	Email address: usertesting@example.com	Text is accepted	Expected outcome was met and the text was accepted	PASS
Testing the Email address field on the Contact Us page as a logged in user	No test data	Email address field is read only	Expected outcome was met and the Email address field was read only	PASS
Testing the Subject field on the Contact Us page	Subject: Delivery question	Text is accepted	Expected outcome was met and the text was accepted	PASS
Testing the Message field on the Contact Us page	Message: Please can you help with my order	Text is accepted	Expected outcome was met and the text was accepted	PASS
Testing the Send message button on the Contact Us page	Full name, email, subject and message entered	Message is sent	Expected outcome was met and the message was sent	PASS
Testing the success message on the Contact Us page after sending a message	Full name, email, subject and message entered	Success message is shown	Expected outcome was met and the success message was shown	PASS
Testing replies linked to the signed in user on the Contact Us page	Log in as standard user with previous inquiry	Saved reply is shown	Expected outcome was met and the saved reply was shown	PASS

Testing the empty inquiry message on the Contact Us page	Log in as standard user with no inquiries	Empty message is shown	Expected outcome was met and the empty message was shown	PASS
Testing the Admin Inquiries page is not accessible by non logged in users	No test data	Login page is loaded	Expected outcome was met and the Login page loaded	PASS Testing the Admin Inquiries page is not accessible by standard users	No test data	Access Denied page is loaded	Expected outcome was met and the Access Denied page loaded	PASS Testing the Admin Inquiries page is not accessible by producer users	No test data	Access Denied page is loaded	Expected outcome was met and the Access Denied page loaded	PASS Testing the Admin Inquiries page is accessible to admin users	No test data	Admin Inquiries page is loaded	Expected outcome was met and the Admin Inquiries page loaded	PASS

Testing the search bar on the Admin Inquiries page	Search: delivery	Matching inquiries are shown	Expected outcome was met and matching inquiries were shown	PASS
Testing the Unread filter on the Admin Inquiries page	Status: Unread	Unread inquiries are shown	Expected outcome was met and only unread inquiries were shown	PASS
Testing the Read filter on the Admin Inquiries page	Status: Read	Read inquiries are shown	Expected outcome was met and only read inquiries were shown	PASS
Testing the Oldest first sort on the Admin Inquiries page	Sort: Oldest first	Oldest inquiries are shown first	Expected outcome was met and the oldest inquiries were shown first	PASS
Testing the Clear button on the Admin Inquiries page	Search and filter applied	All inquiries are shown again	Expected outcome was met and all inquiries were shown again	PASS
Testing the View button on the Admin Inquiries page	No test data	Inquiry Details page is loaded	Expected outcome was met and the Inquiry Details page loaded	PASS
Testing the Mark read button on the Admin Inquiries page	Log in as admin with unread inquiry	Inquiry is marked as read	Expected outcome was met and the inquiry was marked as read	PASS

Testing the Inquiry Details page is not accessible by non logged in users	No test data	Login page is loaded	Expected outcome was met and the Login page loaded	PASS Testing the customer message is shown on the Inquiry Details page	No test data	Customer message is displayed	Expected outcome was met and the customer message was displayed	PASS
Testing the Save reply button on the Inquiry Details page	Reply message: Thanks for your message	Reply is saved	Expected outcome was met and the reply was saved	PASS
Testing the Back to inquiries button on the Inquiry Details page	No test data	Admin Inquiries page is loaded	Expected outcome was met and the Admin Inquiries page loaded	PASS
Testing the Login page loads	No test data	Login page is loaded	Expected outcome was met and the Login page loaded	PASS

				Testing the Email address field on the Login page	Email address: jamie@example.com	Text is accepted	Expected outcome was met and the text was accepted	PASS Testing the Password field on the Login page	Password: TestPassword123!	Text is accepted	Expected outcome was met and the text was accepted	PASS Testing the Remember me checkbox on the Login page	No test data	Checkbox can be ticked	Expected outcome was met and the checkbox could be ticked	PASS Testing the Forgot password link on the Login page	No test data	Forgot Password page is loaded	Expected outcome was met and the Forgot Password page loaded	PASS

				Testing the Create an account link on the Login page	No test data	Register page is loaded	Expected outcome was met and the Register page loaded	PASS Testing validation on the Login page with empty fields	No test data	Validation message is shown	Expected outcome was met and the validation message was shown	PASS

				Testing the Register page loads	No test data	Register page is loaded	Expected outcome was met and the Register page loaded	PASS Testing the Email address field on the Register page	Email address: jamie@example.com	Text is accepted	Expected outcome was met and the text was accepted	PASS

				Testing the Password field on the Register page	Password: TestPassword123!	Text is accepted	Expected outcome was met and the text was accepted	PASS Testing the Confirm password field on the Register page	Confirm password: TestPassword123!	Text is accepted	Expected outcome was met and the text was accepted	PASS Testing the Sign in link on the Register page	No test data	Login page is loaded	Expected outcome was met and the Login page loaded	PASS

				Testing validation on the Register page when passwords do not match	Password: TestPassword123! Confirm password: TestPassword321!
